General Notes:

1. The PDP-4R series of 4-way Power Dividers/Combiners covers 100 - 2000 MHz using a special lumped element design to reduce size making these units ideal for applications where space-saving is essential.
2. Electrical performance is quite good even though units in this series are unusually compact. The 0.805 inch square Meri-Pac™ that houses these 4-way Power Divider/Combiners is ideally suited for airborne and space applications where the inherent package reliability and hermeticity are critical.
