

Aftermarket Services

The Crane Aerospace & Electronics Aftermarket Team offers a multitude of services to reduce your cost of operation and help keep your airplanes flying safely.

Repair and Overhaul

- FAA, EASA, JAA and/or CAAC approved repair shops are located strategically to meet your most critical requirements.
- OEM Quality repair and overhaul services guaranteed to maintain or improve your MTBUR.
- Repair services using ONLY GENUINE FACTORY parts approved for the application.
- Rotable and exchange pools to support time critical requirements and reduced TAT.
- Flat Fee prices for most repairs.
- Fixed cost per flight hour maintenance programs to better manage and forecast maintenance costs on a per-flight-hour basis. Current programs cover Hydro-Aire Fuel Boost and override Jettison pumps.
- Customized long-term repair agreements designed to CAP repair cost over agreement period.
- Performance-based Logistics programs that guarantee a set TAT and price, backed by remedies for noncompliance.

Spares Support

- Spares ordering and administration
- AOG requests are handled within four hours

Warranty Repair and Overhaul

The Aerospace Group maintains FAA, EASA, JAA and/or CAAC approved repair shops to service our respective equipment worldwide. Customers can submit their warranty claims to the respective business unit or approved repair shop for final warranty determination. For contact information, visit www.craneae.com.
