SECTION A - SOLICITATION/CONTRACT FORM

52.217-9002 CONDITIONS FOR EVALUATION AND ACCEPTANCE OF OFFERS FOR PART NUMBERED ITEMS (OCT 2014) DLAD

(a) The product described in the Purchase Order Text (POT) or Procurement Item Description (PID) of this solicitation is that product which the Government has determined to be acceptable. All Offerors shall indicate below, or through an alternative means in an electronic quoting system, whether they are offering an "exact product," an "alternate product" (which includes a "previously reverse-engineered product"), a "superseding part number," or a "previously-approved product," and shall furnish the data required for whichever is applicable. (To determine which type of product to indicate, offerors must refer to the criteria in subparagraphs (b) - (e) of this provision, respectively.) Any product offered must be either a product cited in the POT or PID; or be physically, mechanically, electrically, and functionally interchangeable with a product cited in the POT or PID, including additional requirements referred to in the POT or PID, if any.

[] Exact Product – Applies to CLIN(s):
-] Alternate/Previously Reverse-Engineered Product – pplies to CLIN(s):
[] Superseding Part Number – Applies to CLIN(s):
[] Previously - Approved Product - Applies to CLIN(s):

- (b) "Exact product."
- (1) "Exact product" means a product described by the name of an approved source and its corresponding part number, as currently cited in the POT or PID; modified (if necessary) to conform to any additional requirements set forth in the POT or PID; and manufactured by, or under the direction of, that approved source. If an Offeror indicates that an "exact product" is being offered, the Offeror must meet one of the descriptions in subparagraphs (i)-(iv) below.
- (Any Offeror not meeting one of these descriptions is not considered to be offering "exact product;" even though the item may be manufactured in accordance with the drawings and/or specifications of an approved source currently cited in the POT or PID.) For any Offeror other than the manufacturer cited in the POT or PID, the Contracting Officer may request evidence to demonstrate technical acceptability of the supplies offered. Evidence requested will generally include information tracing the supplies back to the original equipment manufacturer or its authorized distributor. At a minimum, evidence must be sufficient to establish the identity of the product and its manufacturing source. The Contracting Officer determines the acceptability and sufficiency of documentation or other evidence, at his or her sole discretion. If an Offeror fails to provide the requested evidence/information or provides information that the Contracting Officer finds unacceptable, its offer may be rejected with out further consideration under this solicitation.
- (i) An approved source currently cited in the POT or PID offering its corresponding part number as cited in the POT or PID;
- (ii) A dealer/distributor offering the product of an approved source that meets the description in subparagraph (i) above;
- (iii) A manufacturer who (A) produces the offered item under the direction of an approved source currently cited in the POT or PID; and (B) has authorization from that approved source to manufacture the item, identify it as that approved source's name and part number, and sell the item directly to the Government. If requested by the Contracting Officer, the Offeror must provide documentation to demonstrate such authorization, or other evidence of technical acceptability such as information that traces the supplies back to the original equipment manufacturer. Such evidence could be documentation obtained directly from the approved source or identification on a Web site maintained by the approved source confirming that the manufacturer is an acceptable source for the item identified by that approved source's name and part number. If evidence cannot be obtained directly from the approved source, this does not necessarily preclude acceptance of the offer, if the Offeror provides adequate documentation or other evidence allowing the Contracting Officer to determine the approved source has oversight of and involvement in the manufacturing process.
- (iv) A dealer/distributor offering the product of a manufacturer that meets the description in subparagraph (iii) above. If requested by the Contracting Officer, the Offeror/Contractor must provide documentation that demonstrates such authorization or other evidence of technical acceptability such as information that traces the supplies back to the original equipment manufacturer or its authorized distributor. Such evidence could be documentation obtained directly from the approved source or identification on a Web site maintained by the approved source confirming that the item being offered is produced by a manufacturer that is an acceptable source for the item identified by that approved source's name and part number. If evidence cannot be obtained directly from the approved source or manufacturing source, this does not necessarily preclude acceptance of the offer, if the contracting officer can adequately document that the approved source has oversight of and involvement in the manufacturing process by other means.
- (2) When the POT or PID identifies the item being acquired as a critical safety item (CSI), offers of exact product will be evaluated in accordance with 52.211-9005.
- (c) "Alternate product."
- (1) The Offeror must indicate that an "alternate product" is being offered if the Offeror is any one of the following:
- (i) An Offeror who (A) manufactures the item for an approved source currently cited in the POT or PID; and (B) does not have authorization from that approved source to manufacture the item, identify it as the approved source part number, and sell the item directly to the Government;

CONTINUATION SHEET	REFERENCE NO. OF DOCUMENT BEING CONTINUED:	PAGE 10 OF 19 PAGES
	SPE4A7-16-M-4203	

- (ii) A dealer/distributor offering the product of a manufacturer that meets the description in subparagraph (i) above;
- (iii) An Offeror of a previously reverse-engineered product that is not currently cited in the POT or PID; or
- (iv) Any other Offeror who does not meet the criteria in subparagraphs (b)(1), (d), or (e) of this provision.
- (2) If an alternate product is offered, the Offeror shall furnish with its offer legible copies of all drawings, specifications, or other data necessary to clearly describe the characteristics and features of the alternate product being offered. Data submitted shall cover design, materials, performance, function, interchangeability, inspection and/or testing criteria, and other characteristics of the offered product. If the offered product is to be manufactured in accordance with data the Offeror has obtained from elsewhere within the Government, the Offeror shall either furnish the detailed data specified in this paragraph, or supply a description of the data package in its possession; i.e., basic data document and revision, the date the data was obtained and from whom (Government agency/activity). If the Offeror does not furnish the detailed data with its offer, the Contracting Officer will be unable to begin evaluation of the offered product until such time as the detailed data can be obtained from the Government agency/activity possessing the data. If the alternate product is a previously reverse-engineered product, the Offeror shall provide: traceability documentation to establish that the offered item represents the item specified in the POT or PID (i.e., invoice from an approved source or submission of samples having markings of an approved source); number of samples that were examined; the process/logic used; raw data (measurements, lab reports, test results) used to prepare drawings or specifications for the offered item; any additional evidence that indicates the reverse-engineered item will function properly in the end item; and any evidence that life cycle/reliability considerations have been analyzed.
- (3) In addition, the Offeror may be required to furnish data describing the "exact product" cited in the POT or PID. The data required from the Offeror depends on the level of technical data describing the exact product, if any, available to the Government. The possible levels of technical data the Government may have and the corresponding data submission requirements for Offerors are identified in subparagraphs (a)-(d) below. For the item(s) being acquired under this solicitation, the level of data in the Government's possession and the corresponding requirements for data submission are identified in the POT or PID; or, if not specified in the POT or PID, are as follows: [buyer insert (a), (b), (c), or (d), as applicable, if POT or PID does not identify]. (If the level of data in the Government's possession and Offeror requirements for data submission are not identified in either the POT or PID or in this subparagraph (c)(3), then subparagraph (a) below applies.)
- (a) No data: This Agency has no data available for evaluating the acceptability of alternate products offered. In addition to the data required in subparagraph (c)(2) of this provision, the Offeror must furnish drawings and other data covering the design, materials, etc., of the exact product cited in the POT or PID, sufficient to establish that the Offeror's product is equal to the product cited in the POT or PID.
- (b) Adequate proprietary (i.e., limited rights) data: This Agency possesses adequate drawings and/or specifications for the exact product as cited in the POT or PID, but such data are proprietary (i.e., limited rights) and shall be used only for evaluation purposes. The Offeror must furnish the data required in subparagraph (c)(2) of this provision, but is not required to submit data on the exact product.
- (c) Inadequate data: This Agency does not have adequate data available for evaluating the acceptability of alternate products offered. In addition to the data required in subparagraph (c)(2) of this provision, the Offeror must furnish drawings and other data covering the design, materials, etc., of the exact product cited in the POT or PID, sufficient to establish that the Offeror's product is equal to the product cited in the POT or PID.
- (d) Adequate catalog data: This is a commercial off-the-shelf item. Adequate catalog data are available at the contracting office to evaluate alternate offers. In addition to the data required in subparagraph (c)(2) of this provision, the Offeror must furnish with its offer a commercially-acceptable cross reference list; or legible copies of all drawings, specifications or other data necessary to clearly describe the characteristics and features of the alternate product being offered, sufficient to establish that the Offeror's product is equal to the product cited in the POT or PID. The Offeror is not required to submit data on the exact product.
- (4) Except for indefinite delivery purchase orders (IDPOs), if this solicitation is automated, the Contracting Officer will not evaluate offers of alternate product (which includes offers of previously reverse-engineered product) for the current procurement. Instead, the Offeror shall submit a request to the appropriate location below for evaluation of the alternate product's technical acceptability for future procurements of the same item. The request for evaluation shall cite the National Stock Number (NSN) of the ex act product and, as identified in this provision, include the applicable level of technical data on the alternate and exact products. The level of technical data that the Government has available for use to evaluate the acceptability of an alternate product offered, and the corresponding level of technical data that must be furnished with an offer or alternate product, will be identified either in the POT or PID or in paragraph (c)(2) of the provision of 52.217-9002. If the level of data and submission requirements are not identified in either of these locations in the solicitation, then 52.217-9002(c)(3)(a) applies.
- (i) For solicitation numbers beginning with SPM7 or SPE7 and containing "T" in the ninth position of the PIIN:

(d) "Superseding part number."

- (1) The Offeror must indicate that a "superseding part number" is being offered if the offered item otherwise qualifies as an "exact product," except that the part number cited in the POT or PID has been superseded. The Offeror may be requested to furnish data, or provide confirmation through some other means, sufficient to establish that there are no changes in the configuration of the part. However, if such data are unavailable, the Offeror may be required to furnish technical data as required in paragraph (c) for "alternate products." (If such data indicate there have been changes in the configuration of the part, the offered item must be identified as an "alternate product.")
- (2) For solicitation numbers beginning with SPE or SPM, any data to be furnished with an offer of a "superseding part number" should be mailed to the buyer at the procuring activity address on the solicitation. (Uploading the information with the quotation, or including it in the "Remarks" section, will make the offer a "bid with exception," causing it not to be evaluated.)
- (e) "Previously-approved product."
- (1) If the product offered has previously been furnished to the Government or otherwise previously evaluated and approved, the Offeror shall indicate in the space provided below, or through an alternative means in an electronic quoting system, the contract and/or solicitation number under which the product was furnished or approved.

conclusion manipor and or winder the product	
CLIN NR (s)	have been previously furnished or evaluated and approved under
contract/solicitation number	

- (2) If the product was furnished or evaluated and approved by a contracting activity different from the one issuing this solicitation, Offerors are advised that the Contracting Officer may not have access to records of another activity or other information sufficient to reasonably determine the offered product's acceptability. Therefore, in order to ensure that adequate data is available for evaluation, Offerors may elect to furnish with their offer the information requested by subparagraph (b) or (c) of this provision, whichever is applicable for the offered pro duct. Offerors are advised that if the additional data is not furnished, the Government may not be able to evaluate the offer. (For solicitation numbers beginning with SPE, the information should be mailed to the buyer at the procuring activity address on the solicitation. Uploading the information with the quotation, or including it in the "Remarks" section, will make the offer a "bid with exception," causing it not to be evaluated.)
- (f) For all types of offers ("exact product," "alternate product," "superseding part number," or "previously-approved product"), Offerors shall provide the Contractor and Government Entity (CAGE) Code of the manufacturer and the part number being offered for each item in the solicitation.
- (g) Failure to furnish adequate data and/or information as prescribed in subparagraph (b), (c), (d) or (e) of this provision (when required for the current procurement) within 10 business days or less, or as otherwise required by the Contracting Officer or elsewhere in this solicitation, may preclude consideration of the offer. For automated procurements, it is the responsibility of the Offeror when offering a "superseding part number" or a "previously-approved part number" to ensure that supporting documentation arrives at the contracting activity within 2 business days after the data is requested, or the offer may not be considered. The Agency will make every effort to determine, prior to award, the acceptability of the products offered which meet the following dollar savings threshold shown below, which have a reasonable chance to receive an award; generally, the Agency will not evaluate alternate offers not meeting the dollar threshold. The savings potential is based on the cost of evaluation, and is (\$200.00 if only a local technical evaluation is involved, plus an additional \$1,500.00 for each required Engineering Support Activity evaluation). If the time before proposed award does not permit evaluation and delay of award would adversely affect the Government, alternate offers will not be considered for the current procurements. Instead, they will be evaluated for technical acceptability for future procurements of the same item, if adequate data is submitted, as stipulated above. When an alternate offer will not be considered for the current procurement, the Contracting Officer may

SECTION D - PACKAGING AND MARKING

252.211-7006 RADIO FREQUENCY IDENTIFICATION (SEP 2011) DFARS

- (b)(1) Except as provided in paragraph (b)(2) of this clause, the Contractor shall affix passive RFID tags, at the case- and palletized-unit-load packaging levels, for shipments of items that—
- (i) Are in any of the following classes of supply, as defined in DoD 4140.1-R, DoD Supply Chain Materiel Management Regulation, AP1.1.11:
- (A) Subclass of Class I Packaged operational rations.
- (B) Class II Clothing, individual equipment, tentage, organizational tool kits, hand tools, and administrative and housekeeping supplies and equipment.
- (C) Class IIIP Packaged petroleum, lubricants, oils, preservatives, chemicals, and additives.
- (D) Class IV Construction and barrier materials.
- (E) Class VI Personal demand items (non-military sales items).
- (F) Subclass of Class VIII Medical materials (excluding pharmaceuticals, biologicals, and reagents suppliers should limit the mixing of excluded and non-excluded materials).
- (G) Class IX Repair parts and components including kits, assemblies and subassemblies, reparable and consumable items required for maintenance support of all equipment, excluding medical-peculiar repair parts; and
- (ii) Are being shipped to one of the locations listed at http://www.acq.osd.mil/log/rfid/ or to—
- (A) A location outside the contiguous United States when the shipment has been assigned Transportation Priority 1, or to—
- (B) The following location(s) deemed necessary by the requiring activity:

Contract Line, Subline, or Exhibit Line Item Number	Location Name	City	State	DoDAAC

(2) The following are excluded from the requirements of paragraph (b)(1) of this clause:

(i) Shipments of bulk commodities. (ii) Shipments to locations other than Defense Distribution Depots when the contract includes the clause at FAR 52.213-1, Fast Payment Procedures. (c) The Contractor shall— (1) Ensure that the data encoded on each passive RFID tag are globally unique (i.e., the tag ID is never repeated across two or more RFID tags and conforms to the requirements in paragraph (d) of this clause. (2) Use passive tags that are readable; and (3) Ensure that the passive tag is altimed at the appropriate location on the specific level of packaging, in accordance with MIL-STD-129 (Section 4.9.2) tag placement specifications. (d) Data syntax and standards. The Contractor shall encode an approved RFID tag using the instructions provided in the EPC ¹⁴ Tag Data Standards in effect at the time of contract award. The EPC ¹⁴ Tag Data Standards are available at http://www.eacolobaling.org/standards/. (1) If the Contractor is an EPC(globali ¹⁸ subscriber and possesses a unique EPC ¹⁴ Tag Data Standards document to encode tags. (2) If the Contractor is an EPC(globali ¹⁸ subscriber and possesses an unique EPC ¹⁴ Tag Data Standards document to encode tags. (2) If the Contractor is an EPC(globali ¹⁸ subscriber and possesses an unique EPC ¹⁴ Tag Data Standards document to encode tags. (2) If the Contractor chooses to employ the DoD identifier, the Contractor and subscriber is previously as signed Commercial and Covernment Entity (CAGE) code and shall encode the tags in accordance with the tag identifier details located at http://www.acco.sci.min.iv/CAGE) code and shall encode the tags in accordance with the stajl centifier details located at http://www.acco.sci.min.iv/CAGE) code and shall encode the tags in accordance with the stajl centifier details located at http://www.acco.sci.min.iv/CAGE) code and shall encode the tags in accordance with the stajl centifier details located at http://www.acco.sci.min.iv/CAGE) code and shall encode the tags in accordance with the province and tags and tags and tags and	CONTINUATION SHEET	REFERENCE NO. SECTION H - SPECIAL CONTRACT REQUIREMENTS

52.246-9039 REMOVAL OF GOVERNMENT IDENTIFICATION FROM NON-ACCEPTED SUPPLIES (NOV 2011) DLAD

- (a) The Contractor shall remove or obliterate from a rejected end item and its packing and packaging, any marking, symbol, or other representation that the end item or any part of it has been produced or manufactured for the United States Government. Removal or obliteration shall be accomplished prior to any donation, sale, or disposal in commercial channels. The Contractor, in making disposition in commercial channels of rejected supplies, is responsible for compliance with requirements of the Federal Trade Commission Act (15 United States Code (U.S.C.) 45 et seq.) and the Federal Food, Drug and Cosmetic Act (21 U.S.C. 301 et seq.), as well as other Federal or State laws and regulations promulgated pursuant thereto.
- (b) Unless otherwise authorized by the Contracting Officer, the Contractor is responsible for removal or obliteration of government identifications within 72 hours of rejection of nonconforming supplies including supplies manufactured for the Government but not offered or supplies transferred from the Government's account to the cold storage Contractor's account at origin or destination. (For product rejected at destination and returned to the Contractor's plant, the 72 hour period starts with the time of Contractor receipt of returned product). After removal or obliteration is accomplished and prior to disposition, the Contractor must notify the Government inspector.

SECTION I- CONTRACT CLAUSES

252.203-7000 REQUIREMENTS RELATING TO COMPENSATION OF FORMER DOD OFFICIALS (SEP 2011) DFARS
252.203-7002 REQUIREMENT TO INFORM EMPLOYEES OF WHISTLEBLOWER RIGHTS (SEP 2013) DFARS
252.203-7997 PROHIBITION ON CONTRACTING WITH ENTITIES THAT REQUIRE CERTAIN INTERNAL CONFIDENTIALITY AGREEMENTS (OCT 2015) DFARS

- (a) The Contractor shall not require employees or subcontractors seeking to report fraud, waste, or abuse to sign or comply with internal confidentiality agreements or statements prohibiting or otherwise restricting such employees or contactors from lawfully reporting such waste, fraud, or abuse to a designated investigative or law enforcement representative of a Federal department or agency authorized to receive such information.
- (b) The Contractor shall notify employees that the prohibitions and restrictions of any internal confidentiality agreements covered by this clause are no longer in effect.
- (c) The prohibition in paragraph (a) of this clause does not contravene requirements applicable to Standard Form 312, Form 4414, or any other form issued by a Federal department or agency governing the nondisclosure of classified information.
- (d)(1) Use of funds appropriated (or otherwise made available) by the Continuing Appropriations Act, 2016 (Pub. L. 114-53) or any other FY 2016 appropriations act that extends to FY 2016 funds the same prohibitions as contained in sections 743 of division E, title VII, of the Consolidated and Further Continuing Appropriations Act, 2015 (Pub. L. 113-235) may be prohibited, if the Government determines that the Contractor is not in compliance with the provisions of this clause.
- (2) The Government may seek any available remedies in the event the Contractor fails to perform in accordance with the terms and conditions of the contract as a result of Government action under this clause.
