GENERAL NOTES

The Multi-Mix® CSDZ series provides 10 dB coupling at 2500 MHz. The CSDZ series features accurate coupling factors, low VSWR, and high directivity. The CSDZ series is ideal for use in RF sampling networks and control circuitry in high power applications.

CSDZ directional couplers are based on fusion bonded multilayer stripline structures. The fusion bonding process yields homogeneous monolithic dielectric structures with reliability, ruggedness, and electrical and thermal performance that are superior to conventional adhesive bonding techniques.

Parts, materials and processes are in accordance with Merrimac document CENG-0001 "Standard Design Requirements for Space Qualified Devices".
